User guide for Excel MSWSE EU Template 2.0.6

Version 1.3

How to download the Excel MSWSE EU Template

There are several places where you can find the file and download it to your computer.

1. You can go to <http://www.sjofartsverket.se/en/e-Services/Maritime-Single-Window/Guidance-and-FAQ/> and there you can choose the one you want.
2. When you are logged in to MSW and have created a new visit you can find the file when you press the question mark behind “Upload list” You can find the file under “Crew”, “Crew’s Effects”, ”Passengers”, “Security”, ”Ship-to-ship activities”, “Vehicles, “Ships store” or “Waste”.

The European template comes with example data and one without. You can use any of these two. The one with example data you can use to see what kind of information is required in each column. You can then delete the example written and fill in your own data.

Waste and residues

Waste delivery is mandatory in all Swedish ports and when delivery has started the ship has to deliver all its waste. If the ship has such small amounts of waste on board, that it is unreasonable to deliver, the ship may proceed without delivery.

Note that “Date of last delivery” and “Last port where waste was delivered” is mandatory to report.

If you report manually in excel, you should enter the following:

Port (UNLOCODE)	Port facility code (GISIS)
SESTO	0001
NOOSL	0023

Port (UNLOCODE): In this section you add ports. Make sure you add the right Unlocode. To find the right UN Locode you can visit <https://www.unece.org/cefact/locode/service/location.html>. It is important that the port you want to add in Excel is approved as an actual port. If the port has “1” under the column called [Function](#) it is approved.

Function
1-----
1-3-----
1-----

If you need to add a port which is not on the list or isn't approved ("1" under function) you need to choose another port as closed as possible to your location which is approved and on the list.

Port facility code (GISIS): Here you need to add the correct facility code for the port you want to add. If you are uncertain of which code to use you can use "9999" as an alternative.

*Location	Latitude	Longitude
	-90	-180
SEGOT		
	-62,24	-122,46

Location: When you type in the location you must use the right UN Locode (XXXXX) for that spot. If the location doesn't exist in the UN Locode list you must choose another one that is as close as possible.

Latitude: Latitude must be written as the example above. In this case -90 translate to S 90° and -62.24 to S 62 °24'00.

Longitude: Longitude must be written as the same way. In this case -180 translate to W 180 ° and – 122, 46 to W 122 °46'00.

We recommend you to use location as far as possible because it can be a bit tricky to get the lat/long correctly as the system wants it. Don't fill in lat/long if you already have the UN Locode filled in.

Ship-to-ship activity	R
PassengerMovement	
TakingBunkers	Ship to ship activity
ChangingCrew	PassengerMovement
	TakingBunkers
	ChangingCrew

Ship-to-ship activity: This is where you can add additional information that may be of interest. If you choose to fill in Ship-to-ship activity you need to write and spell exactly as it says in the “Reference data” tab. You can find the correct ones in column R.

If you type something that doesn't exist in the “Reference data” tab the system will translate it into “Miscellaneous”. This means that you must give an explanation of what “Miscellaneous” is inside MSW Reportal. See example below.
